

# REPLACEMENT INSTRUCTIONS FOR LOWER SUPPLY ASSEMBLY

## Part Number B8100-01

Lower Inlet Supply Assembly

Step 1. Turn the water supply off and flush the toilet to relieve any water and air pressure in the vessel. Disconnect the water supply from the shank.

Step 2. Remove the toilet tank from the bowl by removing the nuts/washers or wing nuts from the bottom of the ceramic tank.

Step 3. Unscrew the plastic hex/locknut that holds the shank to the bottom of the ceramic tank and remove the tank to bowl gasket.

Step 4. Unscrew the large plastic nut that holds the vessel to the bottom of the ceramic tank and carefully remove the entire vessel from the toilet tank.

Step 5. Remove the Lower Supply Assembly from the vessel by pulling in a downward motion.

Step 6. Loosen the plastic nut of upper assembly and put the LSA aside

Step 7. Insert the new LSA into rod of the vessel and connect the hose with upper supply assembly

Step 8. Push the new Lower Supply onto the post using an upward motion.

Step 9. Reinstall EcoFlush vessel into ceramic tank, tighten securely, reconnect water supply and check for leaks.
